

Calibrate + Businessolver Pinnacle Partnership

Calibrate

We are proud to have Calibrate as a part of our Pinnacle Partner Program. You trust us to offer your workforce the benefits they need, when they need them. We trust our Pinnacle Partners to help us take those benefits to the next level, ensuring they activate on those benefits throughout the year. These relationships, grounded in empathetic experiences and state-of-the-art innovation, offer quality products and services with secure and seamless integrations.

Our Relationship

It's important that we help our clients provide their employees benefit options that fit a variety of lifestyles and needs. Our partnership with Calibrate ensures that employees have a diverse suite of benefit options through the Benefitsolver® ecosystem that are impactful, personalized, and valuable.

Together, Businessolver and Calibrate offer your employees and adult dependents an effective solution to improve their health and achieve their weight-loss goals. This solution is easily accessible within Benefitsolver, where they expect to, and already go to activate on their benefits.

Why this Benefits You

Immediate Impact. Calibrate puts guardrails around GLP-1 medication use and delivers clinically significant weight loss in as soon as two months after the start of the program, equating to near term ROI in high-cost claim avoidance. This means employees and employers will see the positive results of the program quickly.

Personalized Care. Calibrate provides access to quality one-on-one obesity care through their virtual and digital model. They meet members where they are, to ensure they have a calibrated plan that is tailored to their specific needs and lifestyle.

Business Value. Driving significant weight loss at an average of 15%, and sustained after medication, drives down employer's healthcare claims costs, and provides a valuable benefit that leads to increased retention, and happier, motivated employees.

Who is Calibrate?

Calibrate is the only program delivering medically-supervised obesity care with guardrails around obesity medication use, average 15% sustained weight loss, and a 3:1 near-term ROI in total cost of care savings. We are the only solution that ensures the right member receives the right medication for the right length of time—resulting in sustained, cost-effective outcomes.

The program produces 15% average weight loss across our book of business, with sustained results to 18 months (and to 24 months in our earliest cohort).
