

# Delivering Excellence with the Right Partnership

When PPI Benefit Solutions was founded, the regional benefits administration company focused exclusively on the underserved nonprofit sector. Over the years, they expanded to include corporate clients, and now they support middle-market groups in both sectors.

PPI Benefit Solutions provides a full-service benefits administration approach for its clients, including access to insurance products from top carriers, benefits technology powered by Businessolver®, consolidated benefits billing, and individual employee advocacy when claims issues become complex. Their high-touch, customer-oriented approach is married with deep insurance knowledge and expertise to provide the highest level of technology and service to mid-sized organizations.

## Challenge

In 2004, PPI needed a benefits administration technology partner to reduce paper and enable online enrollment and eligibility management. They needed a solution that was configurable to meet the unique needs of mid-market clients and scalable to keep pace with business growth. PPI wanted a partner that would innovate and grow with them, allowing PPI to continuously meet the needs of an always evolving employee benefits market.
