

The Power for Employees to Access Their Benefits When and Where They Need Them

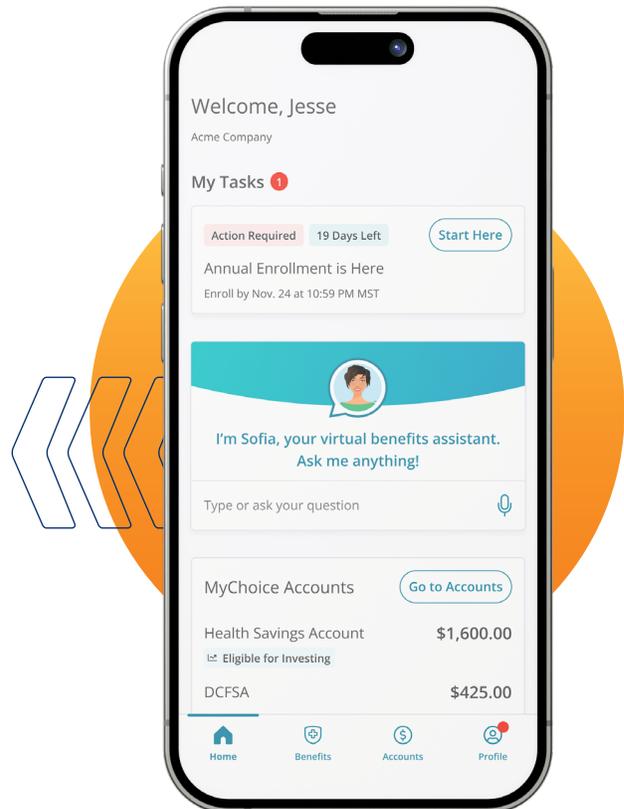

Today's consumers demand simplified access to the every day tools required to manage both their personal and professional lives. The MyChoice® Mobile App was built to create seamless, year-round access to one's benefits.

Backed by empathy-driven design and built around intelligent applications, the award-winning MyChoice Mobile App is your employees go-to source for their benefits needs, no matter where or when they need them.

All their benefits information in the palm of their hand.

The MyChoice Mobile App puts the power of Benefitsolver® in the palm of your employees' hands giving them access to their benefits information **where** and **when** they need it.

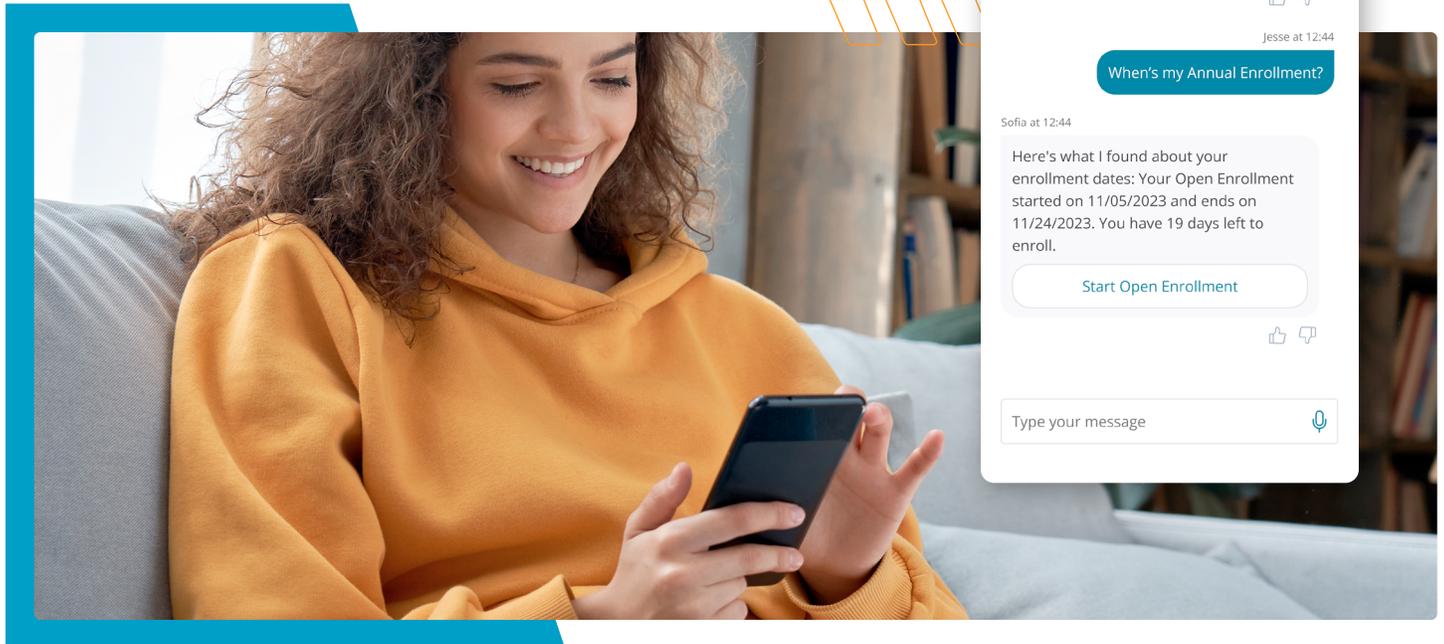

For Employees:

- View a detailed account of their current and future benefits plans.
- View all listed primary and contingent beneficiaries for applicable insurance policies.
- Stay on top of important deadlines, send and receive important documentation in regards to benefits, such as dependent verification and EOI.
- Upload and store images of their ID cards for use on the go.
- Easily contact a Member Advocate or chat with Sofia for general questions about their benefits, enrollment, life events or required documentation.
- Access to view current Spending Account balances, claim transaction history and submit a claim.

For Employers:

- Reduce calls and questions by providing employees with easy access to all of their important benefits information.
- Increase mobile enrollments during your open enrollment season.
- Help eliminate the need to recover Benefitsolver passwords thanks to Single-Sign-On integration.
- Accelerate the dependent verification process as employees can quickly upload their necessary documents within the App.

 **TECH WITH** *heart*
