

Closed Loop Payroll

To put it simply, Closed Loop Payroll closes the loop between what Benefitsolver® assumes will be deducted from a member's paycheck to what is actually deducted.

Using our Closed Loop Payroll function, you can import a deductions report from your payroll system into Benefitsolver and run a comparison against the payroll deductions in Benefitsolver. This gives you the ability to view any discrepancies and provides another level of transparency and accuracy in your payroll file. Ensuring you and your employees are covered and at the right cost.

Utilizing a closed loop payroll process can save you an average of \$2.50 per employee per month!

Payroll Dashboard

- Transparency into your payroll activity
- View every file that has run
- View historic files
- Payroll comparison file exported as Excel file

Why It Matters

Closed Loop Payroll prevents an employee from having the wrong type of coverage amount deducted.

HSA Functionality Included

Using the closed loop payroll process, Benefitsolver can determine any HSA adjustments needed from the payroll file and spread across the remaining pay periods for that year.
