COBRA Administration

Businessolver® makes managing COBRA administration easier than ever. We take the headache and the hassle out of the process by overseeing all COBRA-related activities including compliance, documentation, enrollment, communication, and payment collection.

With Businessolver's all-in-one, single-source platform, Benefitsolver®, your COBRA information will be in the same place as your enrollment and eligibility data. This means:

Complete tracking of an employee's lifecycle:
Benefitsolver tracks the lifecycle of an employee from hire to retire. This means we are there from initial enrollment and life events, to termination and COBRA administration.

Automated Processing:
COBRA notices are automatically triggered as a result of applicable scenarios. When the system receives information that an employee is eligible for COBRA and their coverage is terminated, the Initial Rights and Qualifying Event Notices will generate and be mailed.

Online Enrollment:
We have made enrolling in COBRA easier than ever, with online enrollment in Benefitsolver. Employees simply select the option to enroll, choose their coverages and provide payment. No more paperwork, no more hassle.

90%

There's a reason more than **90 percent** of Businessolver clients use our COBRA Administration Services. You can trust that your employees' valuable COBRA data is protected and that our COBRA administration services will provide the compliance and accuracy you need.
