

## Provider Data

Brand loyalty comes first for many purchases in our lives. The same need for loyalty can also be said about your doctor. Employees want to know that the benefits they are enrolling in, allow them to continue to see the providers they trust. With our provider tool powered by Zelis Health, you can provide peace of mind to your employees, knowing their coverage options will continue to fit their healthcare needs.

- **Assess markets** - Determine with confidence which networks contain your employee's most important doctors and hospitals
- **Look up a provider** - Instant search results for providers across multiple networks
- **Create a directory** - Create a list of providers by specialty for your clients within a specific radius and network
- **Rank networks** - Pick your preferred providers first, then select plan options to see these providers; this will result in your best-fit networks and identify the providers not participating in a network
