

# Options Tailored to You

Brand loyalty comes first for many purchases in our lives. The same need for loyalty can also be said about your doctors. Employees want to know that the benefits they are enrolling in allow them to continue to see the providers they trust. By using our provider tool powered by Zelis Healthcare, you can provide peace of mind to your employees that their coverage options will continue to fit their healthcare needs. Thanks to Zelis, we have access to the largest collection of healthcare provider network data in the U.S.

## Services Provided:

- ▶ **Educate** - Allowing your employees to see which providers are available within your carrier networks will help them make more educated decisions regarding their benefits.
- ▶ **Time** - Bringing the provider information into the enrollment saves your employees time during the Benefitsolver enrollment process and takes full advantage of the 17 minutes you have of their attention.
- ▶ **Save** - Many employees don't consider the costs associated with an out-of-network provider when choosing their coverage, which can cost them a lot of money down the road. By using an in-network doctor, both the employer and the employee save money.
- ▶ **Integrate** - Partnering with Zelis Healthcare means Businessolver clients have access to the largest collection of healthcare provider network data in the U.S.
